Master of Science in Data Science

- Specialization: Data Analytics & Visualization
- Relevant Coursework: Statistics, Machine Learning, Optimization and Simulation, Artificial Intelligence

Indiana University, Kelley School of Business

May 2022

Bachelor of Science in Business

- Major: Entrepreneurship & Corporate Innovation
- Minors: Human-Centered Computing (Luddy School of Informatics); Media (The Media School)

WORK EXPERIENCE

Morningstar

Chicago, IL

Associate Quantitative Analyst

September 2023 — Present

- Monitor markets for rapidly developing trends, transforming large datasets into insights featured in 500+ articles annually across highly regarded financial publications including the New York Times, Wall Street Journal, and Financial Times, a figure that has grown ~5% each year since joining.
- Developed 20+ modular Python tools for recurring data pulls, with team-wide adoption cutting redundant effort and standardizing workflows to save ~5 hours each week.
- Created SQL queries in Amazon Athena to analyze fund portfolio data from the company's data lake, reducing manual processing time by ~90% and giving the team faster access to exposure information.
- Back-test the effects of different investment strategies, sector exposures, and factor-based portfolio allocations over time, assessing their risk and performance metrics.
- Collaborate with research analysts on 12+ data-driven reports annually for external stakeholders, pairing extracted data and visualizations with expert commentary to communicate complex topics clearly and concisely; reports occasionally support executive leadership in high-profile presentations and media appearances.

Financial Product Specialist

July 2022 — September 2023

- Completed an apprenticeship with the Morningstar DBRS Cash Flow Analytics team, gaining hands-on experience with quantitative financial modeling for credit evaluation.
- Contributed to process improvement initiatives and built internal documentation and knowledge-sharing resources.
- Developed deep expertise in the firm's financial data methodologies spanning thousands of datapoints, serving as a go-to resource for resolving complex client issues and escalations.
- Managed a high volume of concurrent client matters in a fast-paced environment, investigating and resolving issues directly while escalating complex cases when warranted.

SKILLS

Programming & Databases: Python, R, SQL, MongoDB

Machine Learning & AI: scikit-learn, TensorFlow, NLP, Large Language Models (LLMs)

Finance & Analytics Tools: Morningstar Direct, Excel, Tableau
