SUMMARY

Quantitative Analyst with 4+ years of experience building and automating investment research processes in R, Python, and SQL. Experience back-testing investment strategies, sector exposures, and factor-based allocations, and evaluating risk and performance metrics across managed investment products. Pursuing an M.S. in Data Science with coursework in statistics, optimization and simulation, and machine learning.

EDUCATION

Indiana University, Luddy School of Informatics

Expected May 2027

Master of Science in Data Science

- Specialization: Data Analytics & Visualization
- Relevant Coursework: Statistics, Machine Learning, Optimization and Simulation, Artificial Intelligence

Indiana University, Kelley School of Business

May 2022

Bachelor of Science in Business

- Major: Entrepreneurship & Corporate Innovation; Minors: Human-Centered Computing, Media

WORK EXPERIENCE

Morningstar

Chicago, IL

Associate Quantitative Analyst

September 2023 — Present

- Back-test investment strategies, sector exposures, and factor-based allocations, evaluating risk and performance metrics to assess methodology and support research conclusions.
- Built and documented 20+ modular Python tools that automate recurring research processes, adopted team-wide, saving ~5 hours per week and standardizing output quality.
- Query Morningstar's data lake in SQL (Amazon Athena) to analyze fund portfolio holdings and exposures, cutting manual processing time ~90%.
- Analyze fund flows, performance, and portfolio data across peer groups to identify market trends, producing insights cited in 500+ articles annually in the Wall Street Journal, New York Times, and Financial Times.
- Collaborate with research analysts on 12+ reports annually, translating quantitative analysis into visualizations and written conclusions for external stakeholders and executive leadership.

Financial Product Specialist

July 2022 — September 2023

- Completed an apprenticeship with the Morningstar DBRS Cash Flow Analytics team, applying quantitative financial modeling to credit evaluation.
- Documented data methodologies spanning thousands of data points and built internal reference materials, serving as the team's primary escalation point for methodology questions.
- Communicated technical analytics concepts directly to institutional clients, resolving a high volume of concurrent matters under tight turnaround.

SKILLS

Programming & Data: R, Python, SQL, MATLAB, Excel

Quantitative Methods: Optimization, Simulation, Statistical Modeling, Back-testing

Investment Research: Strategic Asset Allocation, Exposure Analysis, Risk and Performance Measurement

Tools & Platforms: Morningstar Direct, Amazon Athena, Tableau
